Futourism Travel Agency

Our project is a fictional travel agency and this is a trifold brochure which gives an insight to our travel options. Some themed tours have upgrades, all of them have personalised souvenirs and the possibility to customise the tour in general.

With VR glasses it is possible to provide tours in places that are not necessarily real or physical.

The aim of the project is to think of an alternative, even if utopian, for new forms of tourism. Ironically reproducing the desire for convenience in consumption, catch-phrases known from marketing which we are all invaded by daily and the most explored commercial principles of tourism today, which are the escape from own reality and the exclusivity of that experience.
